**Op Technologies Joins the Virginia SATS Team**

**Beaverton, OR—November 17, 2003** — Op Technologies of Beaverton, Oregon today announced their membership in the Virginia Small Airplane Transport System (SATS) team. Op Technologies was invited to join the Virginia SATS team to provide avionics experience and display systems. The Flight Op Electronic Flight Instrument System (EFIS) and multi-function display (MFD) products will be provided to SATS research aircraft as part of this membership. Op Technologies will also perform research activities to support the development of Lower Landing Minimum (LLM) tools and processes.
