**Op Technologies EFIS and MFD Interfaces with WSI InFlight™**

**Beaverton, OR—April 9, 2004** — Op Technologies has integrated WSI Corp's FAA certified in-flight weather system, WSI InFlight™ with the Flight Op Electronic Flight Instrument System (EFIS) and Multi-Function Display (MFD). WSI-NOWrad® radar mosaic weather imagery, METARS, SIGMETs and AIRMETs can be graphically depicted as layers on the GPS-driven moving map on both the EFIS and MFD products. The InFlight interface is available as a standard software upgrade for existing Flight Op MFD installations and will be included as standard functionality in new shipments beginning in May 2004.
